Summaries.....	151
Streszczenia .....	157
Jacek Augustyn, Maciej Klemiato, Jan T. Duda Reconfigurable Integrated Production Control System of Industrial Processes on QNX Neutrino Platform .....	163
Ewa Dudek-Dyduch, Krzysztof Rączka Selection of Databases for Real Estate Information Systems .....	173
Grzegorz Karpel, Konrad Gac, Maciej Petko FPGA Based Hardware Accelerator for Parallel Robot Kinematic Calculations .....	187
Krzysztof Kołek Application of Android OS as Real-time Control Platform .....	197
Sławomir Nasiadka, Henryk Krawczyk An Architecture of Execution Environment for Context-aware Applications Running in Intelligent Space .....	207
Paweł Skrobanek Minimal Cut Sets with Time Dependencies Analysis .....	219
Piotr Szwed Application of Fuzzy Cognitive Maps to Analysis of Development Scenarios for Academic Units .....	229
Piotr Szwed, Mariusz Duplaga An Approach to Guidelines Implementation in E-health System Supporting Chronic Care .....	241
Grzegorz Śmigielski, Damian Lewandowski, Roman Dygdała Control of Delivery of Water Capsule for the Explosive Generation of Water Spray .....	253
Igor Wojnicki, Michał Rad Rapid Design and Development of Control Applications for Electrical Engineering .....	263

Wojciech Zwonarz

Time Stability of Computer Generated Control in Real-time .....	271
Reports .....	279
Style Sheet .....	282
