

Contents

Preface	137
Aleksandra Przyłucka, Agnieszka Cebo-Rudnicka, Marcin Rywotycki, Joanna Augustyn-Nadzieja, Zbigniew Malinowski Development and verification of the scale growth model during high temperature oxidation for S235 steel	139
Elżbieta Jasiewicz, Beata Hadała, Zbigniew Malinowski Identification of the average and local boundary condition of heat transfer during cooling with a water spray under surface boiling	147
Artur Szajding, Andrzej Gołdasz, Tadeusz Telejko The influence of coolant velocity on the local heat transfer coefficient during steel quenching	157
Marcin Rywotycki, Zbigniew Malinowski, Aleksandra Przyłucka, Krzysztof Sołek The effect of the assumed thermophysical properties of steel on the heat transfer calculation result in contact phenomena	165
Robert Straka, Keerti V. Sharma An accuracy analysis of the cascaded lattice Boltzmann method for the 1D advection-diffusion equation	173
