

Contents

Preface	115
Adam Długosz, Tomasz Schlieter Multiobjective optimization of microstructure parameters in a thermoelastic porous material by means of differential evolution and elements of game theory	117
Izabela Olejarczyk-Woźeńska, Andrzej Opaliński, Barbara Mrzygłód, Krzysztof Regulski, Wojciech Kurowski Bainite transformation time model optimization for Austempered Ductile Iron with the use of heuristic algorithms	125
Danuta Szeliga, Natalia Czyżewska, Jan Kusiak, Roman Kuziak, Paweł Morkisz, Piotr Oprocha, Maciej Pietrzyk, Michał Piwowarczyk, Łukasz Poloczek, Paweł Przybyłowicz, Łukasz Rauch, Natalia Wolańska Thermal-mechanical finite element simulation of flat bar rolling coupled with a stochastic model of microstructure evolution	137
Hanna Sadłowska, Piotr Wójcik Application of the design of experiments and statistical hypothesis to reduce defects in the flange of the steel plate process	149
Piotr Ciepliński, Sławomir Golak, Tadeusz Wiczorek Analysis of modification of the evolutionary algorithm for sequencing production tasks	157
