

CONTENTS

Mariusz Kleć, Danijel Koržinek

Pre-trained deep neural network using sparse autoencoders and scattering wavelet transform for musical genre recognition 133

Bartłomiej Balcerzak, Wojciech Jaworski

Application of linguistic cues in the analysis of language of hate groups... 145

Krzysztof Lorek, Jacek Suehiro-Wiciński, Michał Jankowski-Lorek, Amit Gupta

Automated credibility assessment on Twitter 157

Krzysztof Wołk

Noisy-parallel and comparable corpora filtering methodology for the extraction of bi-lingual equivalent data at sentence level 169

Michał Jankowski-Lorek, Kazimierz Zieliński

Document controversy classification based on the Wikipedia category structure 185

Artur Szymański, Anna Kubis, Andrzej W. Przybyszewski

Data mining and neural network simulations can help to improve Deep Brain Stimulation effects in Parkinson's Disease 199
