

CONTENTS

<i>Pranav Ajeet Nerurkar, Madhav Chandane, Sunil Bhirud</i> Exploring convolutional auto-encoders for representation learning on networks	273
<i>Marcin Lawnik, Adrian Kapczyński</i> Application of modified Chebyshev polynomials in asymmetric cryptography	289
<i>Önder Çoban, Selma Ayşe Özel</i> Adapting text categorization for manifest based Android malware detection	305
<i>Rafał Grzeszczuk</i> Approach to classifying data with highly localized unmarked features using neural networks	329
<i>Mateusz Różański, Leszek Siwik</i> Evolutionary multi-agent system with crowding factor and mass center mechanisms for multi-objective optimization	343
<i>Somasundaram Kanagasabapathi, Chythanya Calicut</i> A routing algorithm and a router architecture for 3D NoC	369
