

CONTENTS

Barbara Głut, Maciej Paszyński

Overview of adaptive and low-rank approximation algorithms
for modeling influence of electromagnetic waves generated
by cellphone antenna on human head. 433

Amin Rezaeiapanah, Fariba Sarhangnia, Mohammad Javad Abdollahi

Meta-heuristic approach based on genetic and greedy algorithms
to solve flexible job-shop scheduling problem 463

Tuan Anh Tran, Jarunee Duangsuwan, Wiphada Wettayaprasit

Novel framework for aspect knowledge base generated automatically
from social media using pattern rules. 489

Damian Goik, Krzysztof Banaś, Jan Bielański, Kazimierz Chłoń

Efficient simulations of large-scale convective heat transfer problems. 517

Mohammad Saleem, Bence Kovari

Optimized jk -nearest neighbor based online signature verification
and evaluation of main parameters. 539

Shahab Wahhab Kareem, Mehmet Cudi Okur

Falcon optimization algorithm for bayesian network structure learning. 553
