

Boualem Alleche and Khadra Nachi
More on the behaviors of fixed points sets
of multifunctions and applications 427

Ilwo Cho
On dynamical systems induced by p -adic number fields 445

Said R. Grace
Oscillation criteria for third order nonlinear delay differential equations
with damping 485

Mohamed Hmissi, Farida Mokchaha, and Aya Hmissi
On potential kernels associated with random dynamical systems 499

Fernando A. Morales
Notes on the nonlinear dependence of a multiscale coupled system
with respect to the interface 517

Jakub Trybula
Optimal consumption problem in the Vasicek model 547
