

Yoshishige Haraoka and Tatsuya Kikukawa
 Rigidity of monodromies for Appell's hypergeometric functions 567

Masaki Hibino
 On the summability of divergent power series solutions
 for certain first-order linear PDEs 595

Kunio Ichinobe and Masatake Miyake
 On k -summability of formal solutions
 for certain partial differential operators with polynomial coefficients 625

Grzegorz Łysik
 On mean-value properties for the Dunkl polyharmonic functions 655

Toshio Oshima
 Katz's middle convolution and Yokoyama's extending operation 665

Akira Shirai
 Maillet type theorem for singular first order
 nonlinear partial differential equations
 of totally characteristic type. Part II 689

Hidetoshi Tahara and Hiroshi Yamazawa
 q -analogue of summability of formal solutions
 of some linear q -difference-differential equations 713

Hidetoshi Tahara
 Analytic continuation of solutions of some nonlinear convolution
 partial differential equations 739

Yoshitsugu Takei
 On the multisummability of WKB solutions
 of certain singularly perturbed linear ordinary differential equations 775

Mika Tanda
 Alien derivatives of the WKB solutions
 of the Gauss hypergeometric differential equation
 with a large parameter 803

Hiroshi Yamazawa and Masafumi Yoshino
 Parametric Borel summability for some semilinear system
 of partial differential equations 825
