

<i>Aurelian Gheondea</i>	
The spectral theorem for locally normal operators	597
<i>Juan Giribet, Matthias Langer, Leslie Leben, Alejandra Maestripieri,</i> <i>Francisco Martínez Pería, and Carsten Trunk</i>	
Spectrum of J -frame operators	623
<i>Piotr Grabowski</i>	
Small-gain theorem for a class of abstract parabolic systems	651
<i>Yaroslav I. Granovskyi and Leonid L. Oridoroga</i>	
Krein–von Neumann extension of an even order differential operator on a finite interval	681
<i>Eduard Ianovich</i>	
On one condition of absolutely continuous spectrum for self-adjoint operators and its applications	699
<i>Yaroslav Mykytyuk and Nataliia Sushchuk</i>	
Inverse scattering problems for half-line Schrödinger operators and Banach algebras	719
<i>Grigori Rozenblum and Grigory Tashchiyan</i>	
Eigenvalue asymptotics for potential type operators on Lipschitz surfaces of codimension greater than 1	733
