

Fatemeh Abdolrazaghi and Abdolrahman Razani
 A unique weak solution for a kind of coupled system
 of fractional Schrödinger equations 313

Daniel Alpay and Ariel Pinhas
 Stochastic Wiener filter in the white noise space 323

Mimia Benhadri, Tomás Caraballo, and Halim Zeghdoudi
 Existence of periodic positive solutions
 to nonlinear Lotka–Volterra competition systems 341

Michał Biel and Zbigniew Skutnick
 A note on confidence intervals for deblurred images 361

Narges Ghareghani, Iztok Peterin, and Pouyeh Sharifani
 A note on bipartite graphs whose $[1, k]$ -domination number
 equal to their number of vertices 375

Michal Staš
 On the crossing numbers of join products of five graphs of order six
 with the discrete graph 383
