

Pablo Amster, Mariel Paula Kuna, and Dionicio Pastor Santos
 Multiple solutions of boundary value problems
 on time scales for a φ -Laplacian operator 405

Khalid Atifi, El-Hassan Essoufi, and Bouchra Khouiti
 An inverse backward problem
 for degenerate two-dimensional parabolic equation 427

Antonio Attalienti and Michele Bufalo
 Option pricing formulas under a change of numéraire 451

Július Czap
 Facial rainbow edge-coloring of simple 3-connected plane graphs 475

Prashanta Garain
 Properties of solutions to some weighted p -Laplacian equation 483

Ching-on Lo and Anthony Wai-keung Loh
 Hilbert-Schmidtness of weighted composition operators
 and their differences on Hardy spaces 495

R. Lakshmi and T. Poovaragavan
 Decompositions of complete 3-uniform hypergraphs into cycles
 of constant prime length 509
