

*Aisha Alshehri, Noha Aljaber, Haya Altamimi, Rasha Alessa,
and Mohamed Majdoub*
 Nonexistence of global solutions for a nonlinear parabolic equation
 with a forcing term 741

Hamid El Bahja
 Regularity and existence of solutions to parabolic equations with
 nonstandard $p(x, t), q(x, t)$ -growth conditions 759

*Bassant M. El-Matary, Hassan A. El-Morshedy, Vasileios Benekas,
and Ioannis P. Stavroulakis*
 Oscillation conditions for difference equations with several variable delays . 789

Jacek Hejduk and Renata Wiertelak
 On the concept of generalization of \mathcal{I} -density points 803

Anna Kosiorowska, Adrian Michalski, and Iwona Włoch
 On minimum intersections of certain secondary dominating sets
 in graphs 813

Mekkia Kouider and Mohamed Zamime
 On the path partition of graphs 829

Gee-Choon Lau, Karl Schaffer, and Wai Chee Shiu
 Every graph is local antimagic total and its applications 841

Michal Staš and Mária Timková
 The crossing numbers of join products of four graphs of order five with
 paths and cycles 865
