Instructions for authors

The Journal **Opuscula Mathematica** publishes significant original research articles in all areas of Discrete Mathematics, Mathematical Physics, Nonlinear Analysis, Probability Theory and Statistics, Theory of Optimal Control and Optimization, Mathematical Economic Theory, Operations Research and Management Science and other areas of Applied Mathematics.

In order to submit a paper for publication, the authors should send two copies of the manuscript to the address of Editorial Office:

Manuscripts should be typed on one side only, double spaced and with generous margins. Footnotes and unusual symbols should be avoided. Figures must be prepared in a form suitable for direct reproduction. If complicated figures or diagrams are used, the corresponding graphic files should be included, preferably in `ps`, `eps`, `pdf` of `tiff` format. Manuscripts may be submitted in English, French, or German. A short abstract of at most 10 rows, a list of keywords, as well as primary and secondary 2000 Mathematics Subject Classification codes should be included and placed before the introduction. Acknowledgements, if any, should be placed before the references. References should be arranged in alphabetical-chronological order. Abbreviations of journals' names and references should follow the standard form established by Mathematical Reviews. Titles of papers written with non-Latin characters should be translated into English. Authors' affiliation should precede the manuscript.

The authors of the papers accepted for publication are kindly requested to send the corresponding TeX (or LaTeX, $\mathcal{AMS}$-TeX etc.) files in a MS-DOS formatted 3.5 in dischette to the Editorial Office or by e-mail to: opuscula@uci.agh.edu.pl.

Authors receive 30 free offprints of their articles. Additional reprints can be ordered.
