

## CONTENTS

---

*Stanisław Białas*

- A Necessary and Sufficient Condition for  $\sigma$ -Hurwitz Stability of the  
Convex Combination of the Polynomials ..... 165

*Bogusław Bożek, Czesław Mączka*

- Calculation of Distribution of Temperature in Three-dimensional Solid  
Changing its Shape During the Process ..... 169

*Stanisław Formella*

- A Note on Geodesic and Almost Geodesic Mappings of Homogeneous  
Riemannian Manifolds ..... 181

*Michał Góra*

- Convex Compact Family of Polynomials and its Stability ..... 189

*Lech Górniewicz*

- Solving Equations by Topological Methods ..... 195

*Julian Janus*

- A Singular Nonlinear Boundary Value Problem  
with Neumann Conditions ..... 227

*Cornelis van der Mee, Vjacheslav Pivovarchik*

- The Sturm–Liouville Inverse Spectral Problem with Boundary Conditions  
Depending on the Spectral Parameter ..... 243

*Piotr Oprocha*

- Topological Approach to Chain Recurrence in Continuous Dynamical  
Systems ..... 261

*Beata Orchel*

- 2-biplacement Without Fixed Points of  $(p, q)$ -bipartite Graphs ..... 269

*M. O. Otieno*

- On Intertwining and  $w$ -Hyponormal Operators ..... 275

*Yarema A. Prykarpatsky, Anatoliy M. Samoilenko, Anatoliy K. Prykarpatsky*

- The Geometric Properties of Reduced Canonically Symplectic Spaces with  
Symmetry, their Relationship with Structures on Associated Principal  
Fiber Bundles and Some Applications. Part 1 ..... 287

*Natalia K. Prykarpatska, Marzena Pytel-Kudela*

- On the Structure of Characteristic Surfaces Related with Partial  
Differential Equations of First and Higher Orders. Part 1 ..... 299
