

CONTENTS

<i>Adam Bednarz</i>	
Exponential type vectors in Wiener algebras on a Banach ball	5
<i>Oksana Bihun, Carmen Chicone</i>	
Deformation minimal bending of compact manifolds: case of simple closed curves	19
<i>Roman Ciarski</i>	
Numerical methods for hyperbolic differential functional problems	29
<i>Mathias Jais</i>	
Classical and weak solutions for semilinear parabolic equations with Preisach hysteresis	47
<i>Paweł Karczmarek</i>	
Singular integral equation with a multiplicative Cauchy kernel in the half-plane	63
<i>Chong Li, Józef Myjak</i>	
Porous sets for mutually nearest points in Banach spaces	73
<i>Zenon Moszner</i>	
Stability of the equation of homomorphism and completeness of the underlying space	83
<i>Ewa Tkocz-Piszczek</i>	
Sign-changing Lyapunov functions in regularity of linear extensions of dynamical systems on a torus	93
Instruction for authors	103
