

CONTENTS

<i>Bogusław Bożek, Wiesław Solak, Zbigniew Szydelko</i> A note on a family of quadrature formulas and some applications	109
<i>Wit Foryś</i> On a complete lattice of retracts of a free monoid generated by three elements	123
<i>Paweł Karczmarek</i> Application of Chebyshev and trigonometric polynomials to the approximation of a solution of a singular integral equation with a multiplicative Cauchy kernel in the half-plane	129
<i>Irina Pchelintseva</i> A first-order spectral phase transition in a class of periodically modulated Hermitian Jacobi matrices	137
<i>Magdalena Piszczek</i> On a multivalued second order differential problem with Hukuhara derivative	151
<i>Elżbieta Puźniakowska</i> On the Chaplyghin method for first order partial differential equations	163
<i>Dorota Pylak</i> Approximate solutions of a singular integral equation with Cauchy kernels in the quarter plane	179
<i>Laurian Suciu, Nicolae Suciu</i> Ergodic conditions and spectral properties for A -contractions	195
Instruction for authors	217
