

<i>Adalys Alvarez, Hugo Lara</i>	
A mixed integer nonlinear programming formulation for the problem of fitting positive exponential sums to empirical data	481
<i>Yury Arlinskiĭ, Yury Kovalev</i>	
Operators in divergence form and their Friedrichs and Kreĭn extensions . . .	501
<i>S. Arumugam, C. Sivagnanam</i>	
Neighbourhood total domination in graphs	519
<i>Olivier Baudon, Frédéric Gilbert, Mariusz Woźniak</i>	
Recursively arbitrarily vertex-decomposable sums	533
<i>Ilwoo Cho, Palle E.T. Jorgensen</i>	
Free probability induced by electric resistance networks on energy Hilbert spaces	549
<i>Sylvia Cichacz, Agnieszka Görlich</i>	
Open trails in digraphs	599
<i>Piotr Jakóbczak</i>	
The Fejer-Riesz type result for some weighted Hilbert spaces of analytic functions in the unit disc	605
<i>Vladimir Lotoreichik</i>	
Singular continuous spectrum of half-line Schrödinger operators with point interactions on a sparse set	615
<i>LinLi Lv, JinRong Wang, Wei Wei</i>	
Existence and uniqueness results for fractional differential equations with boundary value conditions	629
<i>Piotr Niemiec</i>	
Strengthened Stone-Weierstrass type theorem	645
<i>Alina Totoi</i>	
On some classes of meromorphic functions defined by subordination and superordination	651
<i>Marcin J. Zygmunt</i>	
Non symmetric random walk on infinite graph	669
Instructions for authors	675
