

<i>Abdelouaheb Ardjouni and Ahcene Djoudi</i>	
Fixed points and stability in neutral nonlinear differential equations with variable delays	5
<i>Wojciech Banaś</i>	
Compactly supported multi-wavelets	21
<i>Mouffak Benchohra and Fatima-Zohra Mostefai</i>	
Weak solutions for nonlinear fractional differential equations with integral boundary conditions in Banach spaces	31
<i>Denis Blackmore, Anatoliy K. Prykarpatsky, and Yarema A. Prykarpatsky</i>	
Isospectral integrability analysis of dynamical systems on discrete manifolds	41
<i>Florin Bojor</i>	
Note on the stability of first order linear differential equations	67
<i>Ludwik Byszewski and Teresa Winiarska</i>	
An abstract nonlocal second order evolution problem	75
<i>Mustapha Chellali and Lutz Volkmann</i>	
Global offensive k -alliance in bipartite graphs	83
<i>Zagharide Zine El Abidine</i>	
On the existence of positive continuous solutions for some polyharmonic elliptic systems on the half space	91
<i>Marek Galewski and Joanna Smejda</i>	
A note on a fourth order discrete boundary value problem	115
<i>Fugen Gao and Xiaochun Fang</i>	
Weyl's theorem for algebraically k -quasiclass A operators	125
<i>José Giménez, Nelson Merentes, and Sergio Rivas</i>	
Integral Representation of functions of bounded second Φ -variation in the sense of Schramm	137
<i>Marcin Krzywkowski</i>	
An upper bound on the total outer-independent domination number of a tree	153
<i>Ewelina Mainka-Niemczyk</i>	
Some properties of set-valued sine families	159
<i>Bartosz Micherda</i>	
A characterization of convex φ -functions	171
<i>JinRong Wang</i>	
Analysis of integrodifferential control system with pulse-width modulated sampler on Banach spaces	179
